## In-Clinic Medication Dispensing Program

✓ **COST SAVINGS**

This program requires no contract pharmacy or on-site pharmacist, thus reducing your overhead costs and eliminating the customer per-bottle dispensing fee charged by contract pharmacies.

✓ **CENTRALIZED MANAGEMENT**

Our web-based application allows you to manage multiple dispensing locations, place orders and generate reports from any computer with an internet connection, as well as monitor dispensing activities, transactions and inventory.

✓ **CONVENIENCE**

Patients can have immediate access to their medications at the point-of-care, increasing therapy compliance while saving time and money.

✓ **EXTEND YOUR SERVICES**

Offer patients at your satellite clinics the same benefits you can provide at your larger locations.

✓ **PRICING**

Competitive pricing with special 340B pricing for qualifying clinics.

# COMMUNITY HEALTH

## In-Clinic Medication Dispensing Program

For years, community health centers (CHC) have provided barrier-free access to medications by providing on-site pharmacy services to their patient population. Traditionally, however, only the highest volume CHCs have had the ability to do this in a cost-effective manner, due to barriers such as regulations, operational overhead and a shortage of pharmacy resources. A-S Medication Solutions is the perfect tool to eliminate these barriers, allowing you to develop an on-site medication dispensing program, extend pharmacy services to your satellite clinics or improve the efficiency of your current program, regardless of your clinic's size.

The ASM dispensing program presents a broad formulary of AA- and AB-rated generics to fulfill your dispensing needs. 340B eligible entities can now efficiently provide patients in need with low cost medication before they leave the clinic, providing convenience for patients, while increasing therapy compliance.

### Designed to improve the efficiency of community health centers, our turn-key program includes:

- Prepackaged medications, eliminating the need to pour, count and package each prescription
- Software that can manage inventory, create records, run patient DURs, print pharmacy labels and much more
- Access to over 2,500 generic, brand name and OTC medications, creams, ointments, liquids and suspensions
- ePedigrees with each medication
- Same day shipment on most medications
